

Trading Journal Template

A trading journal is your most valuable tool for improvement. Log every trade. Below is a simple format you can recreate in Excel or Google Sheets.

Journal Columns

- **Date/Time:** When the trade was executed.
- **Asset/Pair:** e.g., XAU/USD, EUR/USD.
- **Direction:** Long (Buy) or Short (Sell).
- **Entry Price & SL / TP:** Your precise numbers.
- **Risk (\$ / %):** How much capital was at risk.
- **Result (R):** Express profit/loss in Risk Multiples (e.g., +2R, -1R).
- **Setup / Notes:** E.g., 'Break and retest on 1H'.

Example Entry

Date	Pair / Setup	Result
Oct 12, 09:30	XAU/USD - BOS Retest	+2.5 R
Oct 13, 14:00	EUR/USD - Range Play	-1.0 R
Oct 14, 08:15	GBP/JPY - Trend Continuation	+1.8 R

Weekly Review

At the end of every week, review your journal. Identify which setups are winning, what mistakes cost you money (like moving your stop loss), and adjust your plan for next week.
